

Take Care

flipturn

Cool it, babe, slow down
Mind the waves, don't drown
And I can tell it wears you out
Molotov breakdown

Sold a flame, you burnt out
And don't it make 'em so fuckin' proud?

Cool it, babe
Don't be brave
Save your strength
You don't have to sustain

Feed the flow, wash out
Come and go, you know how
Climate change still freaks you out
So common sense can calm you down

Clinging to your blonde hair
I only hope you take care

Cool it, babe
Glowing's vain
And shadows stain
But you don't have to explain
You have nothing to explain
