

Breakthrough

Flora Cash

People are starting to really get to me
I just wish I could take you away truly
I just wish I didn't feel that it's well
If it ends well

I'm pulling out all my hair when they tell me
We gotta keep building it up but they don't see
The clock is just ticking away so we'll do it alone then

Let's take a walk and just vent like we do
And remember you have me and that I have you
And it's okay, we'll do it our own way

'Cause where are these people when we really need them
On to the next shiny object they see
And it's sad 'cause, they're gonna miss us

And when we breakthrough
We need to tear it up
We gotta leverage it all 'cause fuck it, it's break or make do
And when we breakthrough
We need to tear it up
We need the courage to fail but stay in the show for take two
When we breakthrough
And when we breakthrough

I thought of it often
It kept me awake
The key to surviving
Is that it trends well

Nothing was given us
Everything earned
Didn't come easy
but that's how we learned
Difficult luck
Is what we call not giving it up

And when we breakthrough
We need to tear it up
We gotta leverage it all 'cause fuck it, it's break or make do
And when we breakthrough
We need to tear it up
We need the courage to fail but stay in the show for take two
And when we breakthrough...

I wanna feel it
The way we felt then
We had a lot to lose
But even more to attend to
Wanna feel you
The way I used to
When we were starting out
And always said...

And when we breakthrough
We need to tear it up

We gotta leverage it all 'cause fuck it, it's break or make do
And when we breakthrough
We need to tear it up
We need the courage to fail but stay in the show for take two
And when we breakthrough...
(I thought of it often, it kept me awake...)
And when we breakthrough
