

The Night Is Young

Flora Cash

I poured my heart out
And you needed to dig it out
All over again
Poor you
Put your hands up high
And you said, "I'm really in love"
Like you knew
The night

The night is young
And people won't stop
The night is young
And people won't stop
Doing the things
Doing the things we love
And I will last until the last lights
Doing the things, doing the things we love

I threw a bottle up in the sky
You told me I coulda
Died
That's fucked up
I really love life

The night is young
And people won't stop
Doing the things
Doing the things they love

And then we're woken up
By the spirit of God

I threw a bottle up in the sky...
The night is young and people won't stop

Keep your light up
Don't ever take it back

Keep your light up
Don't ever take it back

(Til the last light)
The night is young
And people won't stop
The night is young
And people won't stop
