

## you're a star, baby

Flora Cash

We made believe  
That every day  
Would never end or go to waste fucked around to dull the pain

But what we missed  
Was going on  
Right in front of us all along  
And now the pain is of something gone

Don't you give up on me you've got heights to reach you're a star  
baby

Don't you give up the dream there's no time to sleep you're a star

You're a star baby you're a star  
(Na, na, na...)

Try to find  
A better place  
Than on this rock in outer space on this ride through the milky  
way

So when the veil  
Begins to fall  
You'll dry your eyes and heed the call but don't look back or it  
might dissolve

Don't you give up on me you've got heights to reach you're a star  
baby

Don't you give up the dream there's no time to sleep you're a star

You're a star baby you're a star  
(Na, na, na...)

You're a star baby you're a star  
(Na, na, na...)
