Strangeness & Charm

Florence + the Machine

Hydrogen in our veins, it cannot hold itself, our blood is boiling
And the pressure in our bodies that echoes up above it is exploding
And our particles that burn it all because they aim for each other
And although we stick together it seems that we are stranging one another

Feel it on me love
Feel it on me love
Feel it on me love
(Strangeness and Charm)

See it on me love
See it on me love
See it on me love
(Strangeness and Charm)

An atom to atom oh can you feel it on me love
A pattern to pattern oh can you see it on me love
Atom to atom oh what's the matter with me love

Strangeness and Charm

The static of your arms, it is the catalyst
You're a chemical that burns there is nothing like this
It's the purest element but it's so volatile
An equation heaven sent, a drug for angels

Strangeness and Charm

Feel it on me love
Feel it on me love
Feel it on me love
(Strangeness and Charm)

See it on me love
See it on me love
See it on me love
