

## The End

Flotsam and Jetsam

I have seen the future as clear as the shit in the sky  
I have seen the four eyed creatures hissing poison 'till it die  
s  
I have seen the shadows laughing as they run on by  
I have seen the bad moon rising blackening the lit up sky  
I have touch the scales of a dragon and the soul of a warrior  
I will start the world on fire like I've never been there befor  
e

I can see the end  
Is taking over  
And it always brings me down

Colors of the sunset glowing evil all night long  
Darkened haze that hides the city from the peaks of the mountai  
n's song  
Prison walls all built from mistakes, the same ones that locked  
us in  
No plans to stop the bleeding as the artery rips within  
The devil fights the angel, evil tells him that he's got the ri  
ght  
Common sense can fix our society, I just can't do it tonight

I can see the end  
Is taking over  
And it always brings me down
