

## Squirrel Cinderella

Flower Face

Another beam of light for my collection  
No one told me how much this would hurt  
My sweetheart has something to tell me  
But I won't be the one to hear it first

I didn't sleep all week in California  
Never thought that things could get so bad  
Try to take some solace in the sunlight  
It's not much, but it's the only thing we have

Now I've become a squirrel Cinderella  
The days fly by the window of my room  
Sitting on the balcony forever  
Convince myself that I'll never miss you

And I've tried so hard to find a soft way out

Summer's on her way, she's bringing molly  
And Jenna's got a necklace with a spoon  
The internet is gonna make me crazy  
Mountains are trees, I don't believe in the moon

The drugs don't work the way they used to  
And you don't send me dirty pictures anymore  
Half a bottle down so I don't miss you  
Just a three day headache, nothing more

And someday we might laugh about this, baby  
But right now it just makes me want to cry  
You're already thinking about Christmas  
I just want to make it through July

Now I've become a squirrel Cinderella  
Waking up in someone else's room  
Sitting on the balcony forever  
Just another morning without you

And I've tried so hard to find a soft way out
