

Survive

Flux Pavilion

Here we go again
Woke up to a brighter day
Everything we need
But we wanna hide away
Wanna come to life
As we slowly drift away
Wanna take a chance
But we just can't find the way

Here we go again
It's always on our mind
Like a parasite
That just keeps us paralyzed
Wanna come to life
It's enough to make you cry
Barely holding on
We just want to say goodbye
Say goodbye, say goodbye

I look to the sky
I will survive (I will survive)
Take me away from this life
One step at a time
I will survive (I will survive)
Wanna feel more than alive

Always on my mind
I will survive (I will survive)
Take me away from this life
One step at a time
I will survive (I will survive)
Wanna feel more than alive

Here we go again
Made it through calamity
If you left us now
It would be catastrophe
Even though it hurts
Why not try again today
You can feel brand new
Make it better every day

Here we go again
One more day under the sky
Reaching through the wind
We can make it through the night
Even though it hurts
We can hold tight to this life
See heaven here on earth
If you just open your eyes
Just open your eyes, just open your eyes

I look to the sky
(I will survive)
Take me away from this life
One step at a time
I will survive (I will survive)

Wanna feel more than alive

Always on my mind
I will survive (I will survive)
Take me away from this life
One step at a time
I will survive (I will survive)
Wanna feel more than alive

Breathe the air
Come to life
Put your faith in me
Fly every time we touch
Follow me
Beyond here and now

I look to the sky
I will survive (I will survive)
Take me away from this life
One step at a time
I will survive (I will survive)
Wanna feel more than alive

Always on my mind
I will survive (I will survive)
Take me away from this life
One step at a time
I will survive (I will survive)
Wanna feel more than alive
