

Running

Fly By Midnight

We go through our phases
I know people change
So if you go changing
I'll twist into your shape

If you caught a problem
And you needed space
I'd lasso the moon, gather the stars
And ask them all to start running

Start running

I've been there beside you
I've seen what you've seen
If love is a question
You've never been one to me

Oh look how far we have come from the start
Oh and I don't think that we'll ever stop

Running
Oh baby we're running
Ooh
Like the AC on a hot LA summer night
You and I
We just keep running
Oh baby we're running
Ooh
Like my heartbeat when you look at me
Every time
You and I
We just keep running

Through the lines on the pavement
To the life that we're chasing
We'll run for the hills
Build us a house
On memory lane like

Oh look how far we have come from the start
Oh and I don't think that we're gonna stop

Running
Oh baby we're running
Ooh
Like the AC on a hot LA summer night
You and I
We just keep running
Oh baby we're running
Ooh
Like my heartbeat when you look at me
Every time
You and I
We just keep running

Like the Chevy in the driveway
Running

Like Forest on the highway
Like the AC on a hot LA summer night
You and I
We just keep running
Like a child on the loose babe
Running
Running wild next to you babe
'Cause my heart beats when you look at me every time
You and I
(We just keep running)
And I
(We just keep running)
And I
(We just keep running)
(We just keep running)
