

Toy

Fly By Midnight

Two a.m. at my apartment
And I can tell he's on your mind
The way we were touching is
Not the smartest thing to do this late at night

I know I know I know I know you need a distraction
I've been I've been I've been I've been there too
So I let it happen
I'll keep you company
Anything that you need I'll do
Oh

I can be a toy for you
You can use me till you find somebody new
I'll wind up my back for you
Help you get over the shit that you've been through

Three a.m. you're dying to call him
Happens every time we're alone
Right now it's hard to see with the past in the way
And your body on me but I won't let us get too close

I know I know I know I know you need a distraction
I've been I've been I've been I've been there too
So I let it happen
I'll keep you company
Anything that you need I'll do
Oh

I can be a toy for you
You can use me till you find somebody new
I'll wind up my back for you
Help you get over the shit that you've been through
So come on push my buttons
Don't expect me to break
This ain't love so don't mistake

I can be a toy for you
You can use me till you find somebody new

Till you find somebody new
Till you find somebody new
Till you find somebody new
Till you find somebody new
Till you find somebody new
Till you find somebody new
Till you find somebody new
Till you find somebody new

Know I know I know I know you need a distraction
I've been I've been I've been I've been there too

I can be a toy for you
You can use me till you find somebody new
I'll wind up my back for you
Help you get over the shit that you've been through
So come on push my buttons

Don't expect me to break
This ain't love so don't mistake

I can be a toy for you
You can use me till you find somebody new
Till you find somebody new
