

## Wanna Be With You

Fly to the Sky

The time stopped just like this (with you)  
Feel each other's body heat (I want you to know)  
Feel everything in this moment (ooh tell me)  
Just wanna be with you  
Only you are my everything (at this moment)  
Feel each other's breathing ( I want you to know)  
Feel everything in this place (ooh tell me  
Just wanna be with you)  
I waited for this moment in my impatience  
Nothing is important now  
It's only the two of us together in this world  
You know I feel for you you feel for me  
We feel the same cause we were meant to be  
There's nothing you could do to make me walk away  
Cause see girl I'm always here to stay  
We've been through things both good and bad  
But I'll never ever leave you cold and sad

I always pray that our love will last  
Forgive me girl for things I've done in the past  
I bought you rings and diamonds and pearls  
I gave you my love and I'll give you my world  
There's an answer I need for the question I ask  
So give it some time if I'm loving too fast  
I'm always there for you, you know  
So live me back don't ever let go  
I wanna be the father of your son and  
I'll love you girl till my life is done  
We passed many days and  
I never got to show you how I felt inside when we met  
From now on we're going to share a soul  
I'm going to show you me, truthfully  
I didn't understand what you really wanted  
But now we're one  
From now till forever
