Pleading cause we prayed for peace tonight Bleeding cause you knew the fight was right Take my hand, we're almost home We can see the fire glow

Save me grace
I'm sick of saving face
Will You hold me close?
You're all I want to know
Anymore

Wake me up with patience I don't know Call me by a name that I love Take my hand, we're almost home We can see the fire glow

Save me grace
I'm sick of saving face
Will You hold me close?
You're all I want to know

Desperate love has got me where You want I surrender
Take us to the place we can start
Happy ever after
Desperate love has got me where You want I surrender
Take us to the place we can start
Happy ever after
Happy ever after

Save me grace
I'm sick of saving face
Will You hold me close?
You're all I want to know
Save me grace
I'm sick of saving face
Will You hold me close?
You're all I want to know
Anymore
