

# Stand

Flyleaf

Breathe on these bones  
Breathe on these bones  
Breathe on these bones

Find there's no need to hide  
The time has come to stand and fight  
Save the world  
And save that girl  
From enemies unseen  
Our hands will  
Bleed for children unborn  
The mornings come and rumors are  
The hope that lasts  
Within our grasp  
If we muster up the strength to grab it

Stand  
Face the world with open hands  
And tears  
And these tired body's spirit perseveres  
Remembering these wounds will heal  
You are not  
Alone in this

We will look ahead  
At the dreams  
That were laid  
In our heart  
And we can begin again

Stand  
Face the world with open hands  
And tears  
And these tired body's spirit perseveres  
Remembering these wounds will heal  
You are not  
Alone in this

How long did You bleed for us  
How long did You bleed for us

Hold fast  
Don't you look at the past  
Because hope and love last  
Beyond the end

Stand  
Face the world with open hands  
And tears  
And these tired body's spirit perseveres  
Remembering these wounds will heal  
You are not  
Alone in this

Stand  
Face the world with open hands  
And tears

And these tired body's spirit perseveres  
Remembering these wounds will heal  
You are not  
Alone in this  
You are not  
Alone in this
