

## Talk

### Fog Lake

You know I hold it against me  
Come back, I know you remember me  
They say I was always crazy  
You know it's all I talk about

Just alone as I'll ever be  
Come back, I know you hate me  
I'd dream, but I can't fall asleep  
You know it's all I think about

Distance can be such a catalyst  
I've been afraid of abandonment  
My love just never felt adequate  
You know it's all I've got now

I won't forget what you said that day  
Don't lie, I know there's not anything  
But I spent centuries waiting  
You know it's all I sought out

And on that birthday you never had  
Black and white roses on your neck  
Wish there was something I could have said  
To turn back time

Your friends shrugged it off when they found out  
You spent your life in a haunted house  
But nobody cares  
What stalks you now

Couldn't extinguish my ailment  
Drinking to feel compassionate  
Maybe these pieces will never fit  
You know it's all I talk about
