

# Under The Influence

Foghat

You got me under the influence  
I can't get out from under your spell  
You got me under the influence  
Feels so good I hope I never get well

Intoxicated and out of control  
On women, wine and rock and roll  
You got me under the influence

First time I saw you, you look so good  
I had to take a pic under the hood  
You ran so hot I could feel the heat  
Baby, that's the hold that you got on me

You got me under the influence  
I can't get out from under your spell  
You got me under the influence  
Feels so good I hope I never get well

Intoxicated and out of control  
On women, wine and rock and roll  
You got me under the influence

Chuck Berry and Jerry Lee  
They brought the fire in sweet sixteen  
Whole lotta shakin' and let it rock  
Once I heard them kill 'em man I couldn't stop

You got me under the influence  
I can't get out from under your spell  
You got me under the influence  
Feels so good I hope I never get well

Sour mash California gray  
All I need was one little taste  
So grab me a Cole warm pour me a shot  
I take a little taste of all that you got

You got me under the influence  
I can't get out from under your spell  
You got me under the influence  
It feels so good I have to [?] for help

Intoxicated and out of control  
On wine and women and rock and roll  
You got me under the influence

You got me under the influence  
You got me under the influence  
You got me under, got me under  
You got me under the influence, yeah...
