

Starlight

[Follow The Cipher](#)

We're on a daily quest to find the right solution
We raise our hands into the sky to praise our lord
But we will not lie and neither we'll cry, destiny lies in our hands
There's no deny, it's all about will and survive

Sirens screams as we keep on walking
Through the apocalypse

There's nothing left, there is no salvation
Generations of destruction has left us numb
The planets own population
Arming for war against the oppression

Show me what you hide inside
Ignite it to a sparkling light
Join us and become the knights of starlight

We will fly away
And behold the sky as it turns to red
With wings of shining gold
Then winds of starlight will see us all arise

So many years we've traveled
So many days that we've lost
Show them the scars that made us rearmed
To fuel the fire in our hearts

Embrace the flowing life form in this storm
There is hope within your eyes
Now is the time to become the knights of starlight

We will fly away
And behold the sky as it turns to red
With wings of shining gold
Then winds of starlight will see us all arise

People, listen
This, this is the moment
Prepare yourself
Brothers and sisters

Fire
With all of your forces
Fire
With all of your hate
Fire
For all of our voices
This must end

Show me what you hide inside
Ignite it to a sparkling light
Join us and become the knights of starlight

We will fly away
And behold the sky as it turns to red
With wings of shining gold
Then winds of starlight will see us all arise

We will fly away
And behold the sky as it turns to red
With wings of shining gold
Then winds of starlight will see us all arise
Arise
