

# Generator

## Foo Fighters

**A**

**E**

Lately I'm getting better

**Asmi**

Wish I could stay sick with you

**D**

**D7**

But there's too many egos left to bruise

**A**

**E**

Call it sin, you can call it whatever,

**Asmi**

Eating deep inside of you

**D**

**D7**

Well if it were me it's all I'd ever do

Steal me now and forever

I'll steal something good for you

The criminal in me is no one new

Till you find something better

When there's nothing left to use

And everything starts going down on you

**A**

**F**

I'm the Generator, firing whenever you quit

**F#mi**

**G**

Yeah whatever it is, you go out and it's on

**D**

Yeah can't you hear my motored heart

**D7**

**E A**

You're the one that started it

Send me out on a tether

Swing it round I'll spin your noose

You let it down

I'll hang around with you, till you find someone better

When there's no one left to use, and everyone keeps going down
