

My Poor Brain

Foo Fighters

C# **F#** **H**
Real life is so hard
C# **F#** **H**
We hide in the stars
C# **F#** **H**
That's where our heads are
C# **F#** **H**
My head and your heart

C# **F#** **H E**
This is a black out
C# **F#** **H E**
Don't let it go to waste
C# **F#** **H E**
This is a black out
C# **F#** **H E**
I want to detonate

When you are so far
I'm falling apart
Lose all my sonar
You jam my radar

This is a black out
Don't let it go to waste
This is a black out
I want to detonate

As **H** **C#**
Sometimes I feel I'm getting stuck
As **H** **C#**
Between the handshake and the fuck

You've got me on guard
I've got my head start
My head and your heart
The same in the stars

This is a black out
Don't let it go to waste
This is a black out
I want to detonate

Sometimes I wish that I could change
I can't save you from my poor brain
