

We've been driving the highway down
Crashing parties, breaking vows
Had a blast to fight forty-five
Hangover payed for a price
Rolling down by the ocean drive
Sweet sweet and open crowd
Baby we could just stay here for a while
Hangout, get dirty

All the broken red lights
And all the versions by now
Been swimming naked for fun
Tricking of the wrong fights
We drove everywhere we liked
The making now with the fire
We fell in love first time
Crying hearts dried out

Baby this is good life, oh
Dreaming of a paradise, yeah
Like shadows in the street lights, oh
Talking 'bout the good good life
Good good life

When we're lost in the trash it town
Waking up in the random ride
I can feel the thrill in your eyes
Come close and cover your lies
We've been kissing in the sea all tight
Sleeping under open skies
Baby we can just breathe in all night
Chainsmoking ashes of fire

Baby this is good life, oh
Dreaming of a paradise, yeah
Like shadows in the street lights, oh
Talking 'bout the good good life
Good good life

We've been driving all night at the speed of sound
Talking 'bout the good good life
(Good good life)
We've been driving all night at the speed of sound
Talking 'bout the good good life

Well baby this is good life, oh
Dreaming of a paradise, yeah
Like shadows in the street lights, oh
Talking 'bout the good good life
Good good life
