

So So Good

FO&O

Hate it
When we're not intoxicated
We only make love when we're faded
It's complicated but it feels
So so so good, so so good

This love is more than obsession
My legs keep running, my heart cries back for more
Of this possession
The cold pain that warms my blood

You know I hate it
When we're not intoxicated
We only make love when we're faded
It's complicated but it feels
So so so good, so so good

You know I hate it
When we're not intoxicated
We're only making love when we're faded
It's complicated but it feels
So so so good, so so good

This love is more than obsession
I'm like a moth drawn into a flame (ey)
Habits that lead to depression
When cold pain runs through my veins (ey)

We go around for a round
We got nothing to hide (nothing to hide)
I'm craving you, I'm losing patience
I swallow my pride, now I'm wasted
Running away from your curse but it keeps me alive (keeps me alive)
The cold pain that warms my blood

You know I hate it
When we're not intoxicated
We only make love when we're faded
It's complicated but it feels
So so so good, so so good (so good, so good, so good, baby)

So so so good, so so good
So so so good, so so good (so good)
So so so good, so so good (yeah but it feels so good)
So so so good, so so good
