

## Beautiful

## Fools Garden

No sun, no shine  
No one online  
No clouds but rain  
Each day the same

Please don't ask why  
I'm down and she's so fucking high  
Maybe thats just the way it goes  
Sometimes, who knows?

She took the long, long way to America  
To see the sun go up in LA  
To be the next big Hollywood superstar  
Someday

She was more than only just beautiful  
She was, but now she's up and away  
So extraordinary radical  
Will I see her again?

You see bright blue skies again  
She said: time will come  
I would realize and then  
I would find someone  
To share my life with  
To waste my precious time

She took the long, long way to America  
To see the sun go up in LA  
To be the next big Hollywood superstar  
Someday

She was more than only just beautiful  
She was but now she's up and away  
So extraordinary radical  
Will I see her again?  
Again?

She was a wonder  
She was a sun girl  
She was brighter  
Than everything  
I was dancing fool  
She was a sky piano  
She was playing inside me  
And now she's sailing out again  
Of my life
