

# Electrify

Fools Garden

Some say we can't reconnect the line  
Once we have electrified our mind  
You woke up in the middle of the clay

We drift into outer space  
Imbued with the love and grace  
Of anything higher  
We dance away  
And now we shine like stars in the sky  
Forever and ever  
We shine

Take care you can't replace it  
This is your life don't waste it  
Don't let it go before it's over  
Before it's over  
Before it's over  
Your mission of space and time

Some say we can't reconnect the line  
Once we have electrified our mind  
You woke up in the middle of the clay

Our soul is a sacred place  
Whenever you lose the faith  
Remember when David cut the line  
And everything went out of control  
Forever and ever  
We shine

Take care you can't replace it  
This is your life, don't waste it  
Don't let it go before it's over  
Before it's over  
Before it's over  
Your mission of space and time
