

# I Burn

Fools Garden

Look at the stars above, what do you know?  
What is this life about, where do we go?  
We're only here for such a little piece of time  
Look at the world and tell me what you see  
There is a place that's made for you and me  
In the eternal space somewhere along the line

And I burn  
I burn  
For you

I was a child, I was so innocent  
Then I grew older tried to understand  
I've lost my faith and suddenly I needed proof  
The more I tried to find the reason why  
The less I knew myself was blinded by  
So many answers that were trying to explain

And I burn  
I burn  
And I burn forever for you

I close my eyes, I feel  
You've fanned the flame in me  
All we need is what we are  
Our life has just begun  
We shine as long as every star  
In the empire of the sun

And I burn  
I burn  
And I burn forever and ever  
And I burn  
You light up my life  
And I burn  
I promise I burn for you  
You light up my life  
I promise I burn forever for you
