

# Water

Fools Garden

In time I reached you at the station  
Somehow I knew, the last goodbye  
It was your final destination  
But you were not afraid to fly

Hey I've seen the water  
Turning into steam and disappear  
Hey can you see the water  
Floating endlessly away from here?

I'll stay your boy I'm always with you  
Somehow I thought you'd never go  
But Daddy I'm ok and though I miss you  
You can leave me here because I know

Hey, I've seen the water  
Rising to the sky and falling down  
Hey can you see the water?  
No one said it's easy when you're gone

So many times I hear you speaking  
I was so afraid to let you go

I'm in your place now  
So many different ways to go  
There is no wrong or right direction  
We all are one the waters flow

Hey I've seen the water  
Washes everything away, the air is clear  
Hey can you see the water?  
We have to walk a long long way from here  
We have to walk a long long way from here  
We have to walk away from here
