

What If

For the Fallen Dreams

Endless white and nothing around
Eyes red filled with dredge and I don't make a sound
But I keep searching that's one thing that's for certain
Close the curtain and learning to love

All the things I took for granted when I open my eyes
But I can see now and there's still hope inside
Bright light I'll fight to do what's right
Just give me one more night

Just tell me everything will be alright
Behind the scars there's really nothing left
Help find me something to reignite
The fire that just burned out

So what if I fall, say a prayer and eternity
Can't save us from the end, fight again
If we all stand up break through with our bare hands

The only absolute truth is death
It proves we do what's best
It's gamble we don't know who's next
Gotta live this life with no regrets

Been to the bottom and I must confess
Finding you is what made me blessed
And if I leave within an inch of my breath
Know that this don't end in death

So what if I fall, say a prayer and eternity
Can't save us from the end, fight again
If we all stand up break through with our bare hands

Say a prayer and eternity
Can't save us from the end fight again
If we all stand up break through with our bare hands

So what if I fall, say a prayer and eternity
Can't save us from the end fight again
If we all stand up break through with our bare hands

Say a prayer and eternity
Can't save us from the end fight again
If we all stand up break through with our bare hands
