

I See You

forever JONES

The first drop of rain in a thunderstorm
The first drop of paint in a masterpiece
The first trip in 30 mile marathon
You're not just a number

Oh I see you and all you do
You're not just a face in the crowd
Yeah I know your name, in touch with your smile
I've been watching you for a while, I see you
I see you [x8]

The one shiny star in a galaxy
The first little note in a symphony
The dim light in the darkest alley way
You're not just a number

Oh I see you and all you do
You're not just a face in the crowd
I know your name, in touch with your smile
I've been watching you for a while

I see more than you think I do
Numbered the hairs on your head
I formed you in your mothers' womb
So beautifully and wonderfully made

Oh I see you
I see you and all you do
You're not just a face in the crowd
I know your name, in touch with your smile
I've been watching you for a while

I see you and all you do
You're not just a face in the crowd (just a face in the crowd)
I know your name, in touch with your smile
I've been watching you for a while

I see you
