

## still around

Foushéé

If you're still around, make sure you make it my way  
I know you're no one's to have, nothing is ours anyway  
And I'll try not to romanticize, but I

I want to be your pride and your joy  
I want to be your light, and I'll sure show you the way  
I'll give you peace of mind, I'll make sure you're okay  
I want to be your pride if you're still around  
If you're still around

This could be the biggest hurdle I've had  
But to love is so much greater than to have  
When you give your heart so freely, so be it  
As it's taking nothing from me, giving thanks to all we see

I want to be your pride and your joy  
I want to be your light, and I'll sure show you the way, ah  
I'll give you peace of mind, I'll make sure you're okay  
I want to be your pride if you're still around  
If you're still around

If you're still around  
Still around
