

Throwdown

Fox Stevenson

I would like if you could see
That something different's what we need
If I said change
I hope you'd say yes
Because everybody knows you're just a problem
That looks great in a little black dress
Dressed to impress

You know we need one more throwdown
With no opinions or changes of heart
You know we needed this right from the start
You know we need one more throwdown
With no opinions or changes of heart
You know we needed this right from the start

Well I'll be fine cause you left me
A little time for me to be, someone else
Someone without you
So I'll give what you took right back
Live like I wish I had
You didn't treat me right
But you didn't want to
If it's real why can't we see it?
If it's so strong why can't we feel it?
Cause it's all gone, you'd better believe it
It feels so wrong, but you know I need this
You know we need one more throwdown
You know we need one more throwdown
You know we need one more throwdown
You know we need one more throwdown
You know we need one more throwdown
With no opinions or changes of heart
You know we needed this right from the start
(Cause it's all gone, you'd better believe it
It feels so wrong, but you know I need this)
