

Friends In The Corner

Foxes

We were younger then
We were half the age
We could see it all
Through a careless sense
My friend

Was it all an act
Was it just pretend
Does it hurt to see
How our smiles have changed
My friend

I took it all for granted
I lived it like a dream
I was always the first person you called when you needed me
Everything is changing
And this is how it's got to be
But how can something so beautiful leave me so desperately

All of my friends in the corner
Everybody's looking like they need someone
Together we're not getting older
But everybody's looking like they need someone

All of my friends in the corner
Everybody's looking like they need someone
Together we're not getting older
But everybody's looking like they need someone

So let's misbehave
These out troubled days
When my home was yours
We were always safe
My friend

I took it all for granted
I lived it like a dream
I was always the first person you called when you needed me
Everything is changing
And this is how it's got to be
But how can something so beautiful leave me so desperately

All of my friends in the corner
Everybody's looking like they need someone
Together we're not getting older
But everybody's looking like they need someone

All of my friends in the corner
Everybody's looking like they need someone
Together we're not getting older
But everybody's looking like they need someone

Do you need someone?
Do you need someone?
Everybody's looking like they need someone

Do you need someone?

Do you need someone?
Everybody's looking like they need someone

All of my friends in the corner
Everybody's looking like they need someone
Pretending we don't fear the morning
But everybody's looking like they need someone

Do you? Do you? Do you?
Do you? Do you? Do you?
