

# Hearts & Daggers

Foxes

You want the fruit that hits the ground  
You like the taste in your mouth  
Bitter-sweet, broken down  
Leaves you feeling wanted  
I was born in the wild  
Let me loose, I'm hunting  
Nature was like a shark  
Send the seeds out in the world

I see a home behind your eyes  
I sleep forever waiting for it  
These open skies where I belong  
You put a roof over me

Hope I don't wake up before you let the light in  
I hope I never see what goes on while I'm sleeping  
Hearts and daggers  
They seem to go together  
Like fire's burning the rain

A drummer beats, a sorry sound  
Gives this marching rhythm  
Through the dark, alone and loud  
This is how we move on  
Pull the stars from the night  
Light the way before you  
Here's a heart, here's a knife  
To cut the ropes and sail away

I see a home behind your eyes  
I sleep forever waiting for it  
These open skies where I belong  
You put a roof over me

Hope I don't wake up before you let the light in  
I hope I never see what goes on while I'm sleeping  
Hearts and daggers  
They seem to go together  
Like fire's burning the rain

Tear up the maps that brought us here  
Never go back and never fear  
Don't let the real world take me away  
Dreaming forever, forever

Hope I don't wake up before you let the light in  
I hope I never see what goes on while I'm sleeping  
Hearts and daggers  
They seem to go together  
Like fire's burning the rain
