

# Go Down Together

Foxing

It's not enough that I'm running on empty  
I had to go and run out while I had you in the car with me  
You see the elephant saddled with a loan  
Hey, ever since I got going I've been going for broke  
Well if I do

You said we'll go down there together  
You and I  
We'll go down there together  
Side by Side  
And if you should fall  
I'll follow behind  
We'll go down there together

It's not enough that you're wrestling yourself  
But your friends talk shit while you're going through hell  
You said it feels like you're swimming through mercury  
And every night you think you're gonna die in your sleep  
Well if you do

Go down there together  
You and I  
We'll go down there together  
Side by Side  
And if you should fall  
I'll follow behind  
We'll go down there together  
Side by Side

We'll go down there together  
We'll go down there together

If you should fall  
I'll follow behind  
And if you should fall  
I'll follow behind  
We'll go down there together  
We'll go down there together  
We'll go down there together  
We'll go down there
