

## A System

Foy Vance

She said, life's like trying to land an aeroplane  
You sure can land the eye inside a hurricane  
It's hard to keep your confidence  
You're only safe as your safest friend

What she needs - is a system

Sometimes life with me is more like aqua planing  
Just hoping that the rubber grips the road again  
When you can't rely on your safest friend  
Well you're only as safe as your common sense

What she needs - is a system  
What she needs - is a system  
What she needs - is a system

She lives life endlessly in soliloquy  
Always lost in thought, never much to say  
When you can't rely on your common sense  
You're only as safe as your best defense

What she needs - is a system  
What she needs - is a system  
What she needs - is a system

We stopped on the one that we had time to make up  
To watch the sun set and the daylight fade away  
She said I hope the sunset never ends  
You know sometimes daddy you're my only friend

What she needs - is a system  
What she needs - is a system  
What she needs - is a system  
Is a system
