

I Won't Let You Fall

Foy Vance

Well you never were the one to say you need something
Always done your worry on your on
Then I came along and got you to wondering
Could I be the one to be the song

When you need me darling, your back's up against the wall
All you do is call, all you do is call
When you need me darling, to help you through it all
I won't let you fall, no I won't let you fall

Lately I've been thinking 'bout time and how it used to feel
When it was mine all mine, and all day long
Now if ever you are alone and you need a heart to steal
I'll be here to listen on the phone

When you need me darling, your back's up against the wall
All you do is call, all you do is call
When you need me darling, to help you through it all
I won't let you fall, no I won't let you fall

When you need me darling, your back's up against the wall
All you do is call, all you do is call
When you need me darling, to help you through it all
I won't let you fall, no I won't let you fall
