

Places We Go

Fractures

Turn around, we could burn out
I don't know why we're waiting
Took our time and torn inside
Since you're here to save me

I never wanna be alone
I take you never went with me
All the places that we go

How long did you wait for me?
How long did they take you from me now?

Setting sun was in your touch
Didn't feel it changing
Pulled up but you launched
Unreciprocated

Out of reach
Couldn't see me falling
Silently
You left, you went your way

Does anybody know if the place we go
Still feels like home
The same [?]

Turn around, we could burn out
I don't know why we're waiting
Took our time and torn inside
Since you're here to save me

I never wanna be alone
I take you never went with me
All the places that we go

How long did you wait for me?
How long did they take you from me now?

Wish that you caught me drifting
Soft as [?] distance
Wish I can make it different
Soft as I take you with me
