

Hold on to me, up close like you mean it  
My heart heavy beating, just hold on  
Come on let's face, we're here for a reason  
Soft touch gives us meaning, so hold on

Remember everything, each moment, each tender kiss  
Implant your energy inside me, entrance my visions with your body  
I feel my senses shift, I tremble with touch of skin  
Only your breath can purify me, reset my mind if ever I leave

Fold me into you, all I want's to be closer  
Leave your scent on my shoulder too  
Chase me end to end, if you lose me in focus  
You'll be safe, I'm the one you fold into

Share your sentiment so quietly, the light leaves  
We stay till morning  
I swear we don't move  
All these ways you've hypnotized me, so kindly  
Caught up in your hold, I'll go where you go
