

Shifted

Fractures

All at once it's hitting me
It caught me off balance while my head was turned
Breathless I can barely move
All these words will never do
Falling hard, this energy
Something shifted, I'm confused
Only people in this room
All these words will never do

What it was, I want to know where it leads
Caught inside, a memory
Stuck in two minds, don't know what came over me
All these words will never do

Wait, this time's different

Slowly

Wait

All at once it's hitting me
It caught me off balance while my head was turned
Breathless I can barely move, again
All these words will never do
Falling hard, this energy
Something shifted, I'm confused
Only people in this room
All these words will never do

I want to be wherever you are
You know I'll wait even if I can't
Wait

I want to be wherever you are
You know I'll wait even if I can't
Wait

I want to be wherever you are
You know I'll wait even if I can't
Wait
