Memory

That look on your face You're breathing at night I'm counting the days and the tears that I cry

You said that you love me Every word is a lie I wanted you near me And now it's goodbye

I'm feeling so deep I'm feeling so wrong You better believe me That love's made me strong

The way you deceived me I've gotta move on Now that you're gone It's only...

Memory, memory, memory It's all over the top now Memory, memory, memory And I need it to stop now

It's only... Memory, memory, memory It's all over the top now Memory, memory, memory And I need it to stop now

Oh yeah

A moment together Is an hour alone A change of direct Means that I'm at fault

One second of hope Is a week of regret The curse of the mind Is that it never forgets

I'm feeling so deep I'm feeling so wrong You better believe me That love's made me strong

The way you deceived me I've gotta move on Now that you're gone It's only...

Memory, memory, memory It's all over the top now Memory, memory, memory Tištěna z pisnicky akordy cz And I need it to stop now Fragma
