

Something Different

Francesco Yates

Fast life loving
Chilling like a villain
Room full of women
But it feels like something's missing
Cause I know they don't shut it down like you girl
Wish you could kick it with me too
Cause the money's on time
Cruising business
Up all night, I've been trippin on this feeling
Cause I know this ain't real life, baby
But if you're faded like I'm faded
Let me hear you say my name
All those nights you wouldn't stay
I got girls all in my crib, and it's all addicted to fame
Damn, I should have known
Man, I swear this story's getting old

So give me something different, babe
Can you give me something different, babe
Give me something real inside
That will make me feel alive, yeah
So give me something different, babe
Can you give me something different, babe
Give me someone I can trust
Don't give me that typical love
Can you give me something different

Gossip and lies
Everybody around me switching sides
Everyone near me about to get loud
Is that a guy screaming it's my time, oh
What's a prince without his princess (princess)
I still wish you were to witness me, girl
It's my zone, it's my life to be in the zone
But, every time when I get home, I wonder if you're still alone
Girl, pick up your phone (pick up your phone)
It's the type of message I just can't leave at the tone
Tired of this same old something

So give me something different, babe
Can you give me something different, babe
Give me something real inside
That will make me feel alive, yeah
So give me something different, babe
Can you give me something different, babe
Give me someone I can trust
Don't give me that typical love
Can you give me something different

Ride or die
Ride or die
Ride or die
You'll ride it with me
We'll ride or die
We'll ride or die
We'll ride or die
We'll rock it babe

Ride or die
True ride or die
True ride or die
True ride or die
Ride it with me (with me)
Ride or die
True ride or die
Ride or die

So give me something different, babe (babe)
Can you give me something different, babe
Give me something real inside (oooh, no, no, no)
That will make me feel alive, yeah
So give me something different, babe
Can you give me something different, babe
(Nah, nah, nah, oooh)
Give me someone I can trust
Don't give me that typical love
Can you give me something different
Ooohh
