

September Rain (Here Comes the Rain)

Frankie Valli

How I remember loving you
That September love we knew
When the leaves died love did too

When you remember September
Remember I love you
(?Near then?) gets lonely with only the memory of you
Here comes the rain
September rain

How I remember loving you
That September love we knew
When the leaves died love did too
Gone are the golden days we shared
When I held you when you cared
All that vanished in the air

Life is a daydream
A grey dream
Still hoping you love me
I can't erase all the traces
Of what used to be

Here comes the rain
September rain

My world came tumbling to the ground
And the pieces that I found
Seem to fit the way I'm bound
Nowhere without you by my side
When you left part of me died
I'm without you by my side
When you left part of me died
When you left part of me cried
Nowhere without you by my side
When you left part of me died
When you left part of me cried
