Gigi (What You Went Through)

Fred again..

I need
I need to leave
I need to leave you alone
I know I made you hurt
I need to leave you alone
I hated what you went through
But I don't treat you right
I need to leave you alone

We fought all night
But I know you're on my side
It's too late to switch minds
But I swear you're in my life
(I hated what you went through)
I need to leave you alone

She gon' make it back
She gon' make it back
All those bad nights
She gon' make it
She gon' make it back

Call late, says you're online
Been let down again for the third night
(I don't treat you right)
It was right there in the green light
I was standing on the outside
(I was there)
I need to leave you alone

She gon' make it back

She gon' make it
She gon' make it back
I was there

She gon' make it back
She gon' make it

She gon' make it back

I don't wanna see you differently
But I need you with me
Emerald seas, you loosen on me
I won't, I won't
I don't wanna see you differently
But I need you with me
Emerald seas, you loosen on me
I won't, I won't
