

After All This Time

Freddie Jackson

It's been a long time
Since I've seen your face
You're in my heart
No one ever good take your place
I've been around the world
Doing what I do
Do it all
All I have sweet memories of you

[Chorus:]
Cause you're still by my side
After all this time
Still my lady
After all this time
You still rock my world
After all this time
You still the one I love
After all this time

We had our ups and downs
Like most people do
Even through the hardest times
I'm thankful for you
All I can say after all these years I know
Your love still moves me down deep on my soul

[Chorus:]
Made me feel good inside
After all this time
Got a love I can't deny
After all this time
Wanna tell my friends about this love
After all this time
You're the only one I'll ever want
After all this time

We build a love to last
Until the end of time
You remain first
In my heart and mind
We have the will to think
Like the rain that falls outside
And it wants us both
Like the sun in the sky

[Chorus:]
Made me feel good inside
After all this time
Got a love I can't deny
After all this time
Wanna tell my friends about this love
After all this time
You're the only one I'll ever want
After all this time
