Fiends coming to cop, free ducking the cops
Cops follow the fiends through the block
On the night shift, night shift, night shift
But we move em all
Get rid of the packs everyday of the month
You act tough keep tools that bust
On the night shift, night shift, night shift

Sun go down, we be up in the place
Fiends, they be out and about, en route
Trying to pick something up, they can trade for the base
And uh, that's basically what it's about
Watch your mouth, the thugs talk
Late night when it's dark, police depart' parked up
Right on my pavement, my patience wearing down
Slowing down my payment, they payment
Throw straight shots at the narcs in the dark
Wouldn't dare try that shit in the day time
I make mine trying to sell 9 million bundles of bounce
They say, 9 million bundles of bounce? How?
Bitch, by the ounce, make em bounce, pill in the mark
& it's still in my heart
Me and the block can't part til I make a substantial amount
And I'm handing em out
Three for five, catch me at the same time tomorrow

Fiends coming to cop, free ducking the cops
Cops follow the fiends through the block
On the night shift, night shift, night shift
But we move em all
Get rid of the packs everyday of the month
You act tough keep tools that bust
On the night shift, night shift, night shift

I'ma sell my packs, you can front if you want
Fiends pack up, jump to the front of the line
Make most mines in the front of the month
Make a little in the end, and a lot in the middle
Now this lady trying to cop, got a lot in the middle
Kicked her out the line, don't need that shit on my mind
Another crack baby up in the spittle, crack put me in the lack
Crack put me in the jail, crack
That I flipped, gave me money for bail
But still had to go to court
Crack, got your boy caught in the system
I'm addicted to L's of dro
Me and M extra night shift collect the dough
Extra clips, for fools running their lips
Or run up on the strip, we protect the dough
Gone in the morning, nighttime freedom on his flip
My knicks be the first to go, so let's go!
