

Our Solar System

Freezepop

I read somewhere that the Sun will explode someday
A giant to swallow the world
But you look so beautiful and so bright
To this cold girl
You're the center of this galaxy
I built tonight
Spinning round and round from dawn to dusk
Kept me alive
Alive, alive
This Star might die
Survive because I stole your fire
Revolve, revolve around your heart
Evolve before you blow apart
If one day you lose control
Destroy our Solar System whole
I'll find, I'll find a galaxy
That won't end me eventually
A telescope helps me search through the heavens
To find a Star, something like you
But conditions have to be just perfect
Yeah, you thought this through
Talking won't help me get off this rock

Escape the sun
All that work for nothing
The future won't know what we've done
Alive, alive
This Star might die
Survive because I stole your fire
Revolve, revolve around your heart
Evolve before you blow apart
If one day you lose control
Destroy our Solar System whole
I'll find, I'll find a galaxy
That won't end me eventually
I gotta leave now just in case
This heavenly body return returns to space
Alive, alive
This Star might die
Survive because I stole your fire
Revolve, revolve around your heart
Evolve before you blow apart
If one day you lose control
Destroy our Solar System whole
I'll find, I'll find a galaxy
That won't end me eventually
