Got you on the wrong side of me Went and had my mind made up so suddenly And it's being hungry when you can't take the thought away Got you on the phone guiltily Thinkin' how you looked at me so eagerly But it was some of them kids in the city Ended up at home on empty with the windows down Tryin' to say everything but knowin' you I'd hate to see you lookin' so down Wish you weren't so tied to me but you are Sooner later happens to all almost you all Right on my way home Still in my mind you can you give us a call? "Summer's so fine I don't need you at all" Right you so said Yeah Ended up at home on empty with the windows down Every time I look at you I see you just like lookin' through the windows downtown Ended up at home on empty with the windows down Tryin' to say everything but knowin' you I hate to see you lookin' so down

Got you on the wrong side of me
Went and had my mind made up so suddenly
And it's being hungry when you can't take the thought away
And it saw this willin' to kill the rest of the day
I tried to look at you that way it drives me hey oh ah
Ended up at home on empty with the windows down
Every time I look at you
I see you just like lookin' through the windows downtown
Ended up at home on empty with the windows down
Tryin' to say everything but knowin' you
I hate to see you lookin' so down
