

Meet Again

Frenship

I feared this moment
For a long, long time
When I leave our bed
And go build mine
These heartbreak choices
They wear you down
And I never loved you
Like I do now

Through the lows and the highs, stack it all up just to find
There's nothing like the pride in your lover's eyes
Through the lows and the rise, stack it all up just to find
There's nothing like the pride in your lover's eyes

When the road divides
Tears hit your chin
In death or life
I hope that we meet again
I guess it's time
For our light to dim
In death or life
I hope that we meet again

That time's come callin'
When I have to let you go
I can see the future
Is gonna wreck what we've grown
Let's just leave the love on our lips
And save it for a later date than this
You will always
Be the best that I've known

Through the lows and the highs, stack it all up just to find
There's nothing like the pride in your lover's eyes

When the road divides
Tears hit your chin
In death or life
I hope that we meet again
I guess it's time
For our light to dim
In death or life
I hope that we meet again

I hope that we meet again

I hope that we meet again
