

Trapped inside a time of madness
As fortune pass me by
The world around is growing
Mankind is so blind

Cold as ice I see the change today
And the world I know it seems to fade away
Everybody fears what we have become

Now get around the show is about to begin
This neverending fight that no one can win
The madness is growing
It's growing stronger day by day
We are the creators
Of the madness of today

The madness around is gathering
The eye of the storm

Stop the madness can't you see what we do
Are we all just being fools
Destroy our world destroy our lives
Put a knife in mother earths heart

Bodies everywhere
The world is in its final state
How could we be such fools
Nobody taught the rules

Cold as ice I see the change today
And the world I know it seems to fade away
Everybody fears what we have become

Now get around the show is about to begin
This neverending fight that no one can win
The madness is growing
It's growing stronger day by day
We are the creators
Of the madness of today

Is this the end of our time will we all die
No saving hand is here to guide us
Turn back the time

Cold as ice I see the change today
And the world I know it seems to fade away
Everybody fears what we have become

Now get around the show is about to begin
This neverending fight tit at no one can win
