

## Came Too Far

Friday

I ain't need no other route I did it my way  
Ain't know when, but I knew we would make it some day  
I was fucked up couldn't focus through them hard days  
All the crazy shit I seen will make you lose your faith  
I was thirteen the first time I saw a cold face  
Every night my momma prayin' that I'm okay  
Ain't believe that we would make it on the front page  
Now we pop out in the city they gon' scream our name

And we done came way too far  
And we done came way too far  
You can not cease us  
Oh we done came way too far  
And we done came way too far  
And we done came way too far  
You can not cease us  
O-oh we done came way too far

Since you are  
God has his hand on you  
Yes, every night I remember your halo  
You were always, always singing  
And I thank God for everything he has done for you  
What you do now is the result of God's favor on you  
And we thank God for everything he has done  
God's been so faithful for us, especially for you  
What the people see now is nothing, is nothing, is nothing  
Everything we taught ya will multiply in Jesus' mighty name  
Don't trust nobody, put your trust in God (in God)  
Where you are going now is not an easy place  
All eyes are on you  
Be focused  
Do mind I pray for you?  
Okay, let me pray for you

And we done came way too far  
And we done came way too far  
You can not cease us  
Oh we done came way too far  
And we done came way too far  
And we done came way too far  
You can not cease us  
O-oh we done came way too far

And we done came way too far  
And we done came way too far (to look back)  
Way too, way too, way too far
