

Feel your body levitate
The chemicals will ease your pain

Yeah, fuck me up

Take this pill and you'll feel fine
The dollar bill's our only sign
Take my soul and watch it burn
America will never learn

Sell me drugs, sell me lies
Lift me up, take me higher and higher
All these pills make me sick
But I still cannot quit
I'm so tired of living
With all of these side effects

Help me feel like I'm okay
They're turning us all into slaves
Take my soul and watch it burn
America will never learn

Sell me drugs, sell me lies
Lift me up, take me higher and higher
All these pills make me sick
But I still cannot quit
I'm so tired of living
With all of these side effects

I live in a blur
An invisible world
Like a vision of earth
Through a mystical pill
It's like I think in a slur
From a written referral
Am I addicted to scripts?
Shit's been gettin' too real
But these pills make it worse
It's a gift and a curse
'Til I'm sick with the words
And I kill every verse
But I'm certain it's worth it
It's perfectly perfect
To hurt all my nerves
'Til I'm burnt and I'm worthless
I'm killing myself
I wasn't feeling myself
I'm getting high off the damage that I did to myself
Cuz the system it sells me a vision of health
Like a picture of heaven while I've been sitting in hell
Every minute that ticks
Gettin' clinically sick
But the meds keep me thinking of slittin' my wrists
And I wish I could quit
Maybe stitch up my lips
But I live for the trip
So just give me the fix

Sell me drugs, sell me lies
Lift me up, take me higher and higher
All these pills make me sick
But I still cannot quit
I'm so tired of living
Tired of living

Sell me drugs, sell me lies
Lift me up, take me higher and higher
All these pills make me sick
But I still cannot quit
I'm so tired of living
With all of these side effects
Side effects!
