

BLOOD

From Fall To Spring

Can't get enough
Cut too deep to stitch it up
(Not enough)
But the pain is so addictive at the top
(Way above)
I'm not even close to reaching what I want
Buckle up
This is gonna hurt a little but it must

Nothing can satisfy me
But the fame and fire
Broken and sleep deprived
Wonder how I'm still alive
This ain't a lullaby
This is where angels die
Let the shadow twist and knot me up inside

I've tasted blood now I want nothing more (nothing more)
This fever haunts me deeper than before (oh oh oh oh)
The deity, I can't deny
See the fear behind my eyes
I've tasted blood now I want nothing more

Can't get enough
Drank the poison from the cup
Now I'm flying through the static and the shock
I'm not even close to reaching what I want
Take the shot
This is gonna hurt like hell I know it does

You don't like it dangerous?
You ain't gonna change this
You are creating an enemy calmly awaiting his manifestation
You don't like it dangerous
I figured I'd change this
Do you really know what fucking pain is?

I've tasted blood now I want nothing more (nothing more)
This fever haunts me deeper than before (oh oh oh oh)
The deity, I can't deny
See the fear behind my eyes
I've tasted blood now I want nothing more

Yeah
I'm low on energy
Lost in my memories
Am I obsessed or do I like the taste of tragedy?
I'm damaged mentally
My own worst enemy
I'm losing grip on my goddamn reality
Goddamn reality
Goddamn reality

I'm low on energy
Lost in my memories
Am I obsessed or do I like the taste of tragedy?

Let the shadows twist and knot me up inside

I've tasted blood now I want nothing more (nothing more)

This fever haunts me deeper than before (oh oh oh oh)

The deity, I can't deny

See the fear behind my eyes

I've tasted blood now I want nothing

MORE!

Goddamn reality

Goddamn reality
