

# SIMULATION.EXE

From Fall To Spring

Abuse my memory  
Succumb to your disease  
Infect me (no antidote)  
Erase me (no thought control)  
Your silence haunts me

I'm addicted to your ghost  
A glitch I can't decode  
You're crashing every part of me (part of me)  
In the afterlight where our love has died

I can run  
I can hide  
I'm still trapped inside

I can run  
I can hide  
I'm still trapped inside

Keep me on  
Feed me your  
Simulated lies

A cycle on repeat  
You're cold, full of disease  
Your virus, it kills me  
Erase my memory

I'm addicted to your ghost  
A glitch I can't decode  
You're crashing every part of me (part of me)  
In the afterlight where our love has died

I can run  
I can hide  
I'm still trapped inside

I'm addicted to your ghost  
A glitch I can't decode  
You fracture every part of me  
Your encoded misery  
Take what's left of me  
You've burned into the core of me  
On the other side  
I cannot survive

Everything, that you did  
Ripped my system through  
I'm so fed up with your sh\*\*\*  
I'm deleting you
